Welcome to the second newsletter from Bowmer + Kirkland, the contractor responsible for the partial redevelopment of Sawston Village College.

## Project Information

We are now well underway with the enabling works which includes establishing the bus turning circle, forming a temporary access road on the sports field and preparing the new build area for construction.

In the coming weeks the bus turning area will be completed and introduced into a new one-way traffic system around the college. We will also be removing the existing tarmac hard standing in the footprint of the new building. The breaking down of tarmac can be noisy by nature but we will do all we can to minimise disruption and ensure all works remain within our approved operating hours (see reverse).

During this time, the temporary changing facilities for the sports centre will be installed which are made up of prefabricated units.

In October, the main works to form the new building will start. This includes excavation works to enable the installation of drainage and foundations.

Throughout the next phase of works we will require frequent deliveries and wagons to remove excavated materials from site. We thank you for your patience and understanding during the construction process and we will keep you updated on forthcoming works with regular newsletters.

Working hours:

Monday - Friday 08:00-18:00

Saturday as required 08:00-13:00

If you have any questions or comments please contact the site manager below.

Alternatively, send us a comment about this site, scan the QR code (right), and send us your message or text (including the site ID number 09906) to 07400 334 880.

## Considerate Constructors Scheme Code of Practice

Organisations registered with the Considerate Constructors Scheme make a commitment to conform to the Code of Considerate Practice.

Through consideration to community engagement, the environment and workforce wellbeing they strive to improve the impact of the construction industry and leave a positive legacy through the implementation of best practice.

The Code of Considerate Practice defines the fundamental expectations for registration with the Scheme. The Code applies equally to all organisations registered with the Scheme, regardless of size, type or location.

### Respecting the Community

Constructors must manage their impact on their neighbours and the public to support a positive experience, by:

- Ensuring courteous and respectful language and appropriate behaviour in and around the construction activity.
- Providing a safer environment, preventing unnecessary disturbance, and reducing nuisance for the community from their activities.
- Proactively maintaining effective engagement with the community to deliver meaningful positive impacts.

### Care for the Environment

Constructors must minimise their impact and enhance the natural environment, by:

- Prioritising environmental issues to protect the natural environment and minimising negative impacts.
- Optimising the use of resources, including minimising carbon throughout the value chain.
- Engaging with the community to improve the local environment in a meaningful way.

### Value their Workforce

Constructors must create a supportive, inclusive, and healthy workplace, by:

- Actively encouraging and supporting an inclusive and diverse workplace.
- Proactively supporting safe working, mental and physical wellbeing at work.
- Providing workplaces that are, well maintained, clean and secure from physical and biological hazards.
